get busy living

The Avalon foot provides 12° of controlled ankle motion, allowing the user to safely negotiate stairs, ramps and environmental obstacles with increased confidence and security.

- Dorsi Flexes from mid-stance to toe off to give a smooth rollover
- Remains dorsi flexed through swing phase for improved toe clearance minimizing the risk of falls
- Provides a more natural gait, reduces the need to compensate by hip hiking, circumduction, or lifting the knee to clear the toe during swing phase
- Biomimetic ankle motion encourages equal loading during ambulation, which leads to less stress thereby preserving the sound side
- Sandal toe foot shell is available in light or dark tone, ships fully assembled with glide sock

The Avalon's biomimetic ankle may help reduce socket pressure and make everyday activities less tiring, encouraging better overall health and well being

avalon

Biomimetic comfort and control for level 2 users

Simple, clear, single
valve resistance
adjustment- continuous
within the range
(no preset stops or clicks)

Prescription Profile:

Max user weight 275 lbs.
